

# HASAN YÜCEDAG

## Fullstack Developer

**Current Location:** Innsbruck, Austria

**Future residence:** Segantinistrasse 93, 8049 Zurich (from August 2026)

**Phone:** +43 660 2499111

**Email:** [yucedagh1@gmail.com](mailto:yucedagh1@gmail.com)

**Linkedin:** [www.linkedin.com/in/hasan-yuecedag](https://www.linkedin.com/in/hasan-yuecedag)

**Portfolio:** <https://hasanyucedagportfolio.vercel.app/>

## Profile

Fullstack Developer with hands-on production experience building AI-powered web applications, cloud-based systems, and high-performance frontends and backends for real clients. Strong focus on API integrations, maintainable architecture, performance optimization, and production-ready deployments. Currently working in an agency environment with direct client communication, technical ownership, and coordinating responsibilities.

## Experience

### Fullstack Developer | florianmatthias

08/2025 - Presente

- Developed and deployed RAG-based AI chatbot systems for client websites, automating support workflows and improving user experience.
- Built modular web and CMS platforms using custom themes, ACF, custom blocks, plugins, and API integrations.
- Deployed and managed production applications on AWS including EC2, S3, and CloudFront-based delivery setups.
- Improved Google PageSpeed scores from ~80 to 95+ through caching, asset optimization, and CDN configuration.
- Collaborated directly with clients and took technical ownership of implementation, quality, and delivery of production-ready solutions.

### Software Development Intern | Translogica

07/2024 - 09/2024

- Implemented and optimized ~20 features in a production environment using C# and the ABP framework.
- Supported debugging, testing, and usability improvements across existing business applications.

## Selected Project

### AI-Powered SEO Automation System | Custom plugin used by multiple clients

- Built from scratch: auto-generates alt texts, fills Yoast SEO metadata, creates internal links, and streamlines on-page SEO workflows.

### RAG-Based Client Website Chatbot | AI workflow for customer-facing websites, used by multiple clients

- Knowledge-based system using site-specific and uploaded sources to answer user questions and reduce manual support effort.

### Performance Optimization & AWS Delivery | Caching, assets, CDN and deployment

- Optimized production websites through caching strategies, image compression, asset loading techniques, and CloudFront-based delivery.

## Education

### Bachelor of Science in Computer Science | University of Innsbruck

2022 - 2025

- Bachelor thesis graded "Very Good"; focus on software development and data-driven applications.

### Matura | BORG Innsbruck, Natural Sciences & Technology

2018 - 2022

TECHNICAL SKILLS

|                |                                                                                   |
|----------------|-----------------------------------------------------------------------------------|
| Languages      | TypeScript, JavaScript, PHP, C#, Java                                             |
